

PRESS RELEASE

Nexans extends Indonesia's information superhighway with Jayabaya submarine fiber optic cable

Nexans has supplied PT Mora Telematika Indonesia (Moratelindo) with a total of 915 kilometers of submarine unrepeated fiber-optic cables that will link Jakarta to Surabaya

Paris La Défense, November 13, 2018 – Indonesia's government has made a commitment to ensure telecommunications and broadband access for the country's fast growing population of 267 million people. In line with this vision, Moratelindo continues to develop the nationwide fiber optic network with the construction of the Jayabaya high speed submarine cable system for Java Island, with Nexans supplying a total of 915 kilometer of fiber optic cables for this project.

The Jayabaya cable will provide a fiber optic link between Jakarta, Indonesia's capital and largest city, and Surabaya, the capital of the East Java province on Java Island. The link will comprise three submarine segments: Jakarta to Cirebon; Cirebon to Semarang; Semarang to Surabaya.

The fiber optic cable is based on Nexans' 24-core unrepeated (URC-1) design. Near the shore, at water-depths below 20 meters, it will feature a double-armed (DA) construction for extra protection against damage from shipping and fishing activities. For depths between 20 and 200 meters a single-armed (SA) fiber optic cable will be deployed.

"In today's hyperconnected world, reliable communications and broadband services are a vital element for the socio-economic development of any country," said **Hans-Martin Norstrøm, sales manager for Nexans' Submarine Telecom and Special Cables (STSC) division.** *"By delivering the Jayabaya fiber optic link, Nexans is very happy to contribute to a further extension of Indonesia's information superhighway, bridging the digital divide for the local communities scattered across the Indonesian archipelago."*

The Jayabaya cable was manufactured at Nexans Norway's facility in Rognan. The installation of the cable is ongoing and is expected to be completed by the end of November 2018.

About Nexans

As a global leader in advanced cabling and connectivity solutions, Nexans brings energy to life through an extensive range of best-in-class products and innovative services. For over 120 years, innovation has been the company's hallmark, enabling Nexans to drive a safer, smarter and more efficient future together with its customers.

Today, the Nexans Group is committed to facilitating energy transition and supporting the exponential growth of data by empowering its customers in four main business areas: Building & Territories (including utilities, smart grids, e-mobility), High Voltage & Projects (covering offshore wind farms, submarine interconnections, land high voltage), Telecom & Data (covering data transmission, telecom networks, hyperscale data centers, LAN), and Industry & Solutions (including renewables, transportation, Oil & Gas, automation, and others).

Corporate Social Responsibility is a guiding principle of Nexans' business activities and internal practices. In 2013 Nexans became the first cable provider to create a Foundation supporting sustainable initiatives bringing access to energy to disadvantaged communities worldwide. The Group's commitment to developing ethical, sustainable and high-quality cables drives its active involvement within several leading industry associations, including Europacable, the National Electrical Manufacturers Association (NEMA), International Cablemakers Federation (ICF) or CIGRE to mention a few.

Nexans employs more than 26,000 people with an industrial footprint in 34 countries and commercial activities worldwide. In 2017, the Group generated 6.4 billion euros in sales. Nexans is listed on Euronext Paris, compartment A.
