

## Nexans wins umbilical contract from McDermott for BP's greater Tortue Ahmeyim project

- *Nexans will provide management, procurement, engineering, manufacturing and testing activities for the umbilicals and ancillary hardware.*
- *The Tortue field is located approximately 120 km offshore the coast of Mauritania and Senegal and its subsea system includes a total of 4 wells.*

**Paris La Défense, August 28, 2019** - McDermott Marine Construction Limited has awarded a contract to Nexans for the supply of approximately 100 km subsea umbilicals and accessories for the Greater Tortue Ahmeyim natural gas project offshore Mauritania and Senegal.

Under the terms of the contract, Nexans will provide management, procurement, engineering, manufacturing and testing activities for the umbilicals and ancillary hardware.

The electrical cables and fibre optics will be manufactured at Nexans Norway plant in Rognan and the umbilicals will be developed, manufactured and tested at Nexans Norway specialized plant in Halden. The delivery will take place in 2021.

**Vincent Dessale, Senior Executive Vice President for Subsea and Land Systems at Nexans** said: *"The Greater Tortue Ahmeyim contract is of strategic importance to Nexans in maintaining a market position in the West African region as well as being a part of a new, ultra-deepwater gas development. It highlights our continuous drive to develop competitive solutions for complex field developments."*

### Notes to editors

The Tortue field is located approximately 120 km offshore the coast of Mauritania and Senegal straddling the maritime border, in 2,850 m water depth. The subsea system includes a total of 4 wells at first gas, clustered at one drill centre. The production system ties back approximately 70 km to a spread moored FPSO (floating production storage and offloading) unit positioned at the shelf edge in 100-120 m water depth. The FPSO undertakes gas pre-treatment before exporting the gas 35 km to a nearshore hub and terminal facility where the gas is liquefied and offloaded to LNG carriers.

### About Nexans

Nexans brings energy to life through an extensive range of advanced cabling systems, solutions and innovative services.

For over 120 years, Nexans has been providing customers with cutting-edge cabling infrastructure for power and data transmission. Today, beyond cables, the Group advises customers and designs solutions and services that maximize performance and efficiency of their projects in four main business areas: Building & Territories (including utilities, e-mobility), High Voltage & Projects (covering offshore wind farms, submarine interconnections, land high voltage), Telecom & Data (covering data transmission, telecom networks, hyperscale data centers, LAN), and Industry & Solutions (including renewables, transportation, Oil & Gas, automation, and others).

Corporate Social Responsibility is a guiding principle of Nexans' business activities and internal practices. In 2013 Nexans became the first cable provider to create a Foundation supporting sustainable initiatives bringing access to energy to disadvantaged communities worldwide. The Group's commitment to developing ethical, sustainable and high-quality cables also drives its active involvement within leading industry associations, including Europacable, the NEMA, ICF or CIGRE to mention a few.

Nexans employs nearly 27,000 people with industrial footprint in 34 countries and commercial activities worldwide. In 2018, the Group generated 6.5 billion euros in sales.

Nexans is listed on Euronext Paris, compartment A.
